Data Engineering & BI | Production Databricks Pipelines
M.Sc. Applied Data Science, Göttingen

JOB-RELATED ABILITIES

Production Data Pipelines: Databricks and Delta Lake medallion pipelines, owned end to end.

BI & KPI Reporting: gold-layer fact tables and KPI datasets for C-suite reporting.

Data Quality & Reliability: validation, alerting, root-cause fixes; 98% reliability.

Stakeholder Communication: explaining technical work to business and C-suite.

EXPERIENCE

VEERSA TECHNOLOGIES — **Greater Noida, India | 09.24 – 03.26**

Data Engineer (08.25 – 03.26) · Intern (09.24 – 07.25) | Healthcare Data Engineering & Analytics

- **Agent Productivity Analytics Platform**: integrated 5 sources (Pega, Siebel, Amazon Connect, UKG, SharePoint) into a PySpark + Delta Lake medallion pipeline behind C-suite quarterly reporting; sustained **98%** pipeline reliability.
- **Awarded Rising Star, Q3 2025**: one of 2–3 recipients company-wide (~250 employees).
- **Specialty-pharmacy fulfilment pipeline**: powered a major pharmaceutical client's KPI reporting (Completed Fills, Pending Work, Productivity Points, Open Orders) via a gold-layer fact table with multi-join SQL across Snowflake and Databricks and SCD/watermark-based ingestion, processing up to ~1M records/week at peak.
- **Silent data-loss root-cause fix**: diagnosed an upstream schema change that had dropped thousands of Bronze-to-Silver records undetected for months; wrote backward-compatible transformation logic, backfilled all affected history, and extended the DQ framework below to catch this failure class in real time.
- Built a configuration-driven ingestion framework that cut new-client onboarding from **2 weeks to 3 days**.
- Automated SQL-based data-quality checks via Databricks Alerts, flagging invalid-record and run-failure conditions in real time across production healthcare datasets, orchestrated via Databricks Jobs.
- Used AI-assisted coding on all tasks to speed up sprints and find issues, guided by standup and client-meeting context.
- Owned up to 4 concurrent client pipelines end-to-end on Databricks and Delta Lake.

INDIKA AI — **New Delhi, India | 07.24 – 08.24**

AI/ML Intern | AI Data Services Company

- Fine-tuned Whisper via HuggingFace Transformers for Indian-language ASR, cutting word error rate by 30–40% (relative).
- Built an automated audio-extraction pipeline on the YouTube Data API with timestamp control for ASR training datasets.

PROJECTS

FATHOM: Real-Time Market Data Pipeline (with Claude Code) — **github.com/DevOGhere/fathom**

- Redpanda (Kafka) streaming pipeline with Protobuf and Schema Registry: Binance live WebSocket plus Tardis and Databento (CME futures) replay through one parser; sinks to TimescaleDB and ClickHouse, Parquet archive, Prometheus/Grafana.
- **P99 63.4 ms** tick-to-store over a 1-hour live soak (P50 20.4 ms), zero sequence gaps, both stores row-identical; **116k records/s** on replay (7.7x the 15k target); 46/46 tests including golden-hash determinism.

10-BIT VILLAGE: Deterministic Multi-Agent Simulation (with Claude Code) — **github.com/DevOGhere/10-Bit-Village-Engine**

- C++ engine driving 100 villagers, each with a small local LLM (SmolLM2-360M via llama.cpp); same seed gives a byte-identical world (verified by matching state hashes). Full state checkpointed, runs live on a free 2-vCPU host.

EDUCATION

GEORG-AUGUST-UNIVERSITÄT GÖTTINGEN — **Göttingen, Germany | 03.26 – 2028 (expected)**

M.Sc. Applied Data Science

GURU GOBIND SINGH INDRAPRASTHA UNIVERSITY (GGSIPU) — **New Delhi, India | 11.21 – 05.25**

B.Tech. Computer Science & Engineering (Minor: AI & ML), GPA 9.62/10 (≈1.2 German scale, sehr gut)

- Minor Project: comparative study of CLIP, YOLO and CNN for allergen-containing food-item identification; basis of a co-authored computer-vision paper (submitted, IEEE/Scopus-indexed venue).
- Publication: Kundra, R., & Ojaswi. "Assessing the Efficiency of Gradient Descent Variants in Training Neural Networks," *Darpan Int. Research Analysis*, vol. 12, no. 3, Sep. 2024. DOI: 10.36676/dira.v12.i3.114

SKILLS

- **Programming:** Python, SQL, PySpark, C/C++ (DSA)
- **Data Engineering:** Databricks, Delta Lake, Apache Spark, AWS S3, Medallion Architecture, SCD Type 1 & 2, Data Lakehouse
- **CI/CD & Tooling:** Azure DevOps, Git, Databricks Jobs, Claude Code
- **Monitoring & Quality:** Databricks Alerts, SQL-based data-quality validation, data pipeline monitoring
- **Viz & Libraries:** Power BI, Pandas, NumPy, HuggingFace Transformers
- **Languages:** English (C1), German (A2), Hindi (native)
